PRESS RELEASE

MVG announces significant PIT-RADWAR S.A. contract

MVG (Microwave Vision Group) announces a significant contract (circa 9€ million) from PIT-RADWAR S.A. for the purchase of a turnkey, state of the art, antenna test facility in Poland.

This new operation will include two large anechoic chambers, one with a Planar Near field scanner and the other with a compact antenna test range reflector and a highly accurate radar antenna positioner. Both chambers will be delivered as turnkey installations including RF instrumentation, computers and control software. The project, secured in cooperation with ORBIT/FR Europe GmbH and MVG's Polish partner Tespol, is expected to span 18 months and will improve PIT-RADWAR's capability to measure the next generation of radar antennas at their test and measurement facility in Kobyłka, Poland.

Talking about why MVG were selected for this project, Per Noren, EMEA Sales Manager at MVG said "MVG is already known for highly innovative solutions. This project for PIT-RADWAR demonstrates our capability as a turnkey systems provider."

MVG worked very closely with the PIT-RADWAR project team to understand their exact requirements, then MVG's engineering team designed a facility which perfectly suits their test and measurement needs.

Ryszard Kardasz, CEO at PIT-RADWAR S.A., added "This is a unique project not only for Europe, but worldwide. The project scope includes a setup of independent anechoic chambers - one of the largest in Europe - complete with measurement equipment. The chambers will allow us to test and measure a wide variety of antennas and take

electromagnetic compatibility measurements of large-size objects, for example, complete radars and tanks.”

This contract contributes to the increase in MVG’s order book in the first quarter which saw orders rise by 69%.

About MVG | MICROWAVE VISION GROUP

Since its creation in 1987, MVG (Microwave Vision Group) has developed a unique expertise in the visualization of electromagnetic waves. These waves are at the heart of our daily lives: Smartphones, computers, tablets, cars, trains and planes -- all these devices and vehicles would not work without them. Year after year, the Group develops and markets systems that allow for the visualization of these waves, while evaluating the characteristics of antennas, and helping speed up the development of products using microwave frequencies. The Group's mission is to extend this unique technology to all sectors where it will bring strong added value. Since 2012, MVG is structured around 3 departments: AMS (Antenna Measurement Systems), EMC (Electro-Magnetic Compatibility), EIC (Environmental & Industrial Control). MVG is present in 10 countries, and generates 90% of sales from exports. The Group has over 300 employees and a loyal customer base of international companies. The Group generated revenues of € 56.7 million in 2014. MVG has received the BPI "Innovative Enterprise" certification, and is eligible for PEA-PME. About Pit-Radwar S.A.

PIT-RADWAR S.A. is one of the biggest and most important companies in the sector of Poland's defence system, as well as one of the leading providers in the area of professional electronics for the Polish Armed Forces. In the last few decades we have been carrying out research in the area of radiolocation, command and control systems as well as radio reconnaissance technologies. As a result, we are constantly broadening our offer by adding up specialist and innovative solutions serving the security of our country. <http://www.pitradwar.com/>
