Key Words: Measurement / Testing / Wireless / Antenna / Telecomms / OTA / SATIMO / MVG / Microwave Vision

SATIMO Industries renamed MVG Industries

Satimo Industries, the manufacturing division of SATIMO's innovative and unique "multiprobe" technology for fast, accurate measurement and visualisation of electromagnetic fields, will operate under their new name, MVG Industries.

Commenting on the renaming to MVG Industries, Arnaud Gandois, Chief Executive Officer of MVG Industries said :

"The renaming of Satimo to MVG has already commenced, and coincides with our global vision to bring MVG's products together under one strong brand. Our name is what differentiates us in a competitive market place. It reflects MVG's drive to use our many years expertise to continue to develop and deliver highly innovative products of the best quality."

MVG is an industry leader in electromagnetic field measurements in the microwave frequency range. MVG's unique technology, MV-Scan™ "microwave eye", is 100 to 1000 times faster than traditional technologies, which use a single, mechanically-moved probe, demonstrating MVG's pioneering approach to development.

Arnaud continues:

"This is an exciting time for MVG as we witness continual and global growth. Our aim is to harmonise our divisions under one umbrella, making it easier for customers to recognize our products and creating a stronger and more uniform company presence both on and offline."

About MICROWAVE VISION GROUP

Since its creation in 1987, The Microwave Vision Group (MVG) has developed a unique expertise in the visualization of electromagnetic waves. These waves are at the heart of our daily lives: Smartphones, computers, tablets, cars, trains and planes -- all these devices and vehicles would not work without them. Year after year, the Group develops and markets systems that allow for the visualization of these waves, while evaluating the characteristics of antennas, and helping speed up the development of products using microwave frequencies. The Group's mission is to extend this unique technology to all sectors where it will bring strong added value. Since 2012, MVG is structured around 4 departments: AMS (Antenna Measurement Systems), EMC (Electro-Magnetic Compatibility), EIC (Environmental & Industrial Control), and NSH (National Security & Healthcare). MVG is present in 9 countries, and generates 90% of sales from exports. The Group has over 300 employees and a loyal customer base of international companies. The Group generated revenues of €56.75 million in 2014. MVG has received the BPI "Innovative Enterprise" certification, and is eligible for PEA-PME. **NYSE-Euronext : ALMIC | Alternext, code ISIN FR 0004058949 | For more information: <http://www.microwavevision.com>**
