## PRESS RELEASE

### ■ New major commercial success worth more than 30M€.

**MVG (Microwave Vision Group / ALMIC - FR0004058949) announces the signature of a new major contract, worth more than 30 M€ for a measurement system in the Aerospace/Defense sector.** The contract calls for delivery in 2023, with a gradual increase in turnover between 2020 and 2023. The Group anticipates a lighter design phase given the skills acquired on similar systems.

This new major commercial success with this customer highlights MVG's know-how and the quality of its products.

MVG is thus strengthening its position in large-scale measurement systems, a market in strong demand, and confirming its ability to sign very significant contracts enabling it to quickly cross important activity thresholds.

At the same time, the Group also booked two orders with an American newspace player for a total amount close to €4.5 million.

These contracts are part of the order intake for the first quarter of 2020, which is already well oriented, confirming the very good momentum at the beginning of the year.

#### **Next appointment:**

Publication of annual results on April 21, 2019 after the close of trading.

Financial information telephone meeting on April 22, 2019 at 8:30 a.m.

### About MVG | MICROWAVE VISION GROUP

Since its creation in 1986, The Microwave Vision Group (MVG) has developed a unique expertise in the visualization of electromagnetic waves. These waves are at the heart of our daily lives: Smartphones, computers, tablets, cars, trains and planes – none of these devices and vehicles would work without them. Year after year, the Group develops and markets systems that allow for the visualization of these waves, while evaluating the characteristics of antennas, and helping speed up the development of products using microwave frequencies. The Group's mission is to extend this unique technology to all sectors where it will bring strong added value. MVG is structured around 3 departments: AMS (Antenna Measurement Systems), EMC (Electro-Magnetic Compatibility), EIC (Environmental & Industrial Control). MVG is present in 10 countries, and generates 90% of sales from exports. The Group generated revenues of € 87,4 million in 2019.
