Strong growth in the Telecommunications sector (up 18%) made up for the fall in the Aerospace and Defense (- 17%) sector over the first nine months of 2011. For the latter, after a decline over the second quarter, there has been a return to the same production levels as at the start of this year.

Over the last quarter, the Telecommunications sector will enjoy continued growth. The Aerospace and Defense sector will also see significant growth compared to the third quarter, boosted by a number of contracts awarded in Asia since the end of September.
