PRESS RELEASE

MVG signs contract for a large Shielded Chamber project in the UK

Key Words: Measurement / Testing / EMC / shielded / Chamber

MVG (Microwave Vision Group) announces a contract to supply a global leader with a large shielded chamber at one of their UK locations.

This shielded chamber project, worth an estimated €1.6m, is expected to be commissioned in 2016. Talking about why MVG were selected for this project, Paul Duxbury, European Sales Manager at MVG|EMC said *"MVG is already known for delivering pioneering projects. This particular project reinforces our expertise as an EMC shielded chamber provider."*

MVG|EMC worked closely with the customer's project team to fully understand their requirements, and developed a solution including the large shielded chamber to meet their needs. The project is expected to span 12 months and will extend their internal testing capabilities.

About MICROWAVE VISION

Since its creation in 1987, The Microwave Vision Group (MVG) has developed a unique expertise in the visualization of electromagnetic waves. These waves are at the heart of our daily lives: Smartphones, computers, tablets, cars, trains and planes -- all these devices and vehicles would not work without them. Year after year, the Group develops and markets systems that allow for the visualization of these waves, while evaluating the characteristics of antennas, and helping speed up the development of products using microwave frequencies. The Group's mission is to extend this unique technology to all sectors where it will bring strong added value. Since 2012, MVG is structured around 3 departments: AMS (Antenna Measurement Systems), EMC (Electro-Magnetic Compatibility), EIC (Environmental & Industrial Control). MVG is present in 9 countries, and generates 90% of sales from exports. The Group has over 300 employees and a loyal customer base of international companies. The Group generated revenues of € 56.7 million in 2014. MVG has received the BPI "Innovative Enterprise" certification, and is eligible for PEA-PME.
